

Critto

Identify South Africa's wildlife from a photo.

AMD Developer Hackathon: ACT II • Track 3 (Unicorn)

Aidan Dean • Tanner Mundell

THE PROBLEM

People are disconnected from the wild

1

Generic tools

Global apps recognise 80,000 species but know nothing local — no South African depth, no conservation context.

2

Progress vanishes

No accounts: switch phones and your sightings and journal are gone.

3

Shallow engagement

Rewards you forget. They don't teach you anything or get you outside.

South Africa: 850+ bird species, the Big Five, a multi-billion-dollar wildlife-tourism draw — served only by generic apps.

THE SOLUTION

Snap it. Know it. Collect it.

1

Snap

Take or upload a photo of any bird, mammal, or reptile.

2

Know

Instant species ID plus a rich, source-backed field-guide entry.

3

Collect

Earn the card, grow your collection, chase coins and fill your journal.

A South African field guide in your pocket — that turns getting outside into a game.

HOW IT WORKS

One photo, a full field guide

Identification and field-guide content are generated on demand and grounded in real sources (Wikipedia + IUCN), with citations.

USE OF AMD

Built on AMD

Inference via Fireworks AI

Both endpoints call Minimax M3 on Fireworks AI — AMD's inference partner, accessed through the AMD AI Developer Program and powered by AMD Instinct GPUs.

BioCLIP on AMD Instinct (ROCm)

Our specialised classifier is validated directly on AMD Instinct GPUs via ROCm — 99.95% on a test image. The high-accuracy vision path.

AMD on two fronts: our classifier on AMD Instinct (ROCm), and inference via Fireworks AI — AMD's partner.

PROOF

Real recognition. Grounded content.

99.95%

BioCLIP on AMD
Instinct (test)

150

curated SA
species

3

classes: birds,
mammals, reptiles

2

AMD platforms:
Instinct + Fireworks

Field-guide entries are grounded in Wikipedia + IUCN and cite their sources — no invented facts.

DIFFERENTIATION

Why Critto, not a generic ID app

Generic apps (e.g. Seek)

Global & shallow, all species

No accounts — lose your data on a new phone

Generic, forgettable rewards

Just a name and a fact

Critto

South Africa-deep, curated & conservation-aware

Cloud-synced collection — never lose your journal

Conservation-weighted rarity + meaningful sets

Rich, cited field guide + read-aloud

ENGAGEMENT

A collection game with a conservation heart

Rarity cards

Common → Legendary, weighted by how rare and threatened a species is.

Coins

Complete sets — the Big Five, Endangered Guardians, class masters.

Your Journal

A running record of every encounter, synced across devices.

Read-aloud guide

Listen to any species' field-guide entry, hands-free.

Rarity rewards the rare and the threatened — turning spotting into stewardship.

MARKET

Who it's for

Tourists & safari-goers

Millions visit SA for wildlife each year.

Birders & nature lovers

A passionate, list-keeping community.

Schools & education

Hands-on, local biodiversity learning.

Conservation & citizen science

Sightings that build awareness and data.

South Africa draws millions of wildlife tourists a year — Critto is their pocket guide, and a gateway to local conservation.

ROADMAP

Where Critto goes next

1

Now

SA image ID + collection — live now

2

Next

Sound ID — identify birds by their call

3

Then

Beyond SA — region-by-region expansion

4

Later

Social play + verified sightings

TRY IT

See it for yourself

It's live — try it right now.
